

Biology – Ch 3.3 Cell Cycle Regulation

STEM CELLS

Task 1: Match the statement to define Stem Cells?

STEM CELLS

have only 1 function

Stem cells DO NOT

are UNSPECIALISED CELLS

Stem cells can

become any type of cell in body

Task2: Drag the descriptions to the correct Category

Criteria	Embryonic Stem cells	Adult Stem cell
Found in		
Purpose		

Tissues and organs

Embryo – blastocysts

Become any type of
cell

Become same type of
cell where it is found

Task 3: Select True / False

1- Stem cells can be used in Medical research to find cure to diseases: _____
