

REPTILE CHARACTERISTICS

Nutrition

Almost all reptiles are , but some are omnivores.

Reproduction

Most reptiles are .

Reptiles live mostly on land, but some spend time in water. Find out where these aquatic reptiles lay their eggs.

Respiration

Reptiles, like mammals and birds, breathe with their .

Physical characteristics

Reptiles have which provide them with camouflage and protect them from injury. Scales also prevent water evaporation, which means that reptiles do not need much water to survive.

Most reptiles have and , which they use to walk and run. Other reptiles swim. Snakes have no legs, so they slither.
