

FISH CHARACTERISTICS

Nutrition

Fish are a mixture of

,

and

Reproduction

Almost all fish

are

They lay lots of
eggs under water.

Find out about a fish that is not oviparous.

Why do we use the term *salt water*
to describe the sea and ocean?

Respiration

Fish take in the
oxygen they need
from water, using
their

Physical characteristics

Fish have like
reptiles do. The scales
act as armour and
protect them from
injury. Scales also help
fish to swim, as do
their
