

Name: \_\_\_\_\_

Class: \_\_\_\_\_

## 12. Find the Product of Multiplication

### A. Visual learning

 $3 \times 2 = ?$	
<p>We can use <b>model</b>.</p>  So $3 \times 2 = 6$	<p>Or we can use the <b>repeated addition</b>.</p> <p>3 times 2</p> $2 + 2 + 2 = 6$ So $3 \times 2 = 6$
<p>Each number in the multiplication has a name.</p> $\begin{array}{ccc} & 3 \times 2 = 6 & \\ \nearrow & & \uparrow \\ \text{factors} & & \text{product} \end{array}$	

### B. Vocabulary

group: <u>nhóm</u>	repeated addition: <u>phép cộng lặp</u>
factor: <u>thừa số</u>	product: <u>tích</u>

### C. Independent practice

1. Choose the correct answer.  $4 \times 2 =$  \_\_\_\_\_

A.

$$4 \times 2 = 8$$

B.

$$4 \times 2 = 8$$

Choose the model then find the product.

2.

$$2 \times 7 = \underline{\hspace{2cm}}$$

3.

$$3 \times 4 = \underline{\hspace{2cm}}$$

4.

$$5 \times 3 = \underline{\hspace{2cm}}$$

5. There are 4 boxes.

Each box has 5 cakes.

How many cakes are there in all?

a/ Choose the correct model.

A.

B.

b/ Write the numbers.

$$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

There are          cakes in all.
