

**Lesson 9: Divide
by 11 and 12**

Algebra Use the inverse operation to find each unknown.

11. $12 \overline{) 48}$

$$12 \times \square = 48$$

12. $12 \overline{) 96}$

$$12 \times \square = 96$$

13. $11 \overline{) 88}$

$$11 \times \square = 88$$

The unknown is ____.

The unknown is ____.

The unknown is ____.

14. $33 \div 3 = \square$

The unknown is ____.

15. $66 \div 11 = \square$

The unknown is ____.

16. $36 \div 12 = \square$

The unknown is ____.
