Phyla: Porifera

FULL NAME: _____

Phylum: Porifera	Example Animal: Sponges
1. Animals in this phylum are invertebrates.	1. _____
2. They are multicellular. (All animals are!)	2. _____
3. _____	3. _____
4. _____	4. _____
5. _____	

Answer Bank

They **DO** have true tissues.

They live in the water.

They **do not** have true tissues.

They live in the water and they can swim.

Animals in this phylum are the **simplest** animals.

Some can move. Some cannot move.

They have **nematocysts** - these are special cells they use to poison their prey (food).

They **do not** move.

It is the **oldest phylum** of the animal family tree.

Their body plan is **asymmetry**.
It cannot be divided into 2 same parts.

They filter food particles from water when water passes through their bodies.

Their body plan is **radial symmetry**.
