

Double-Digit Subtraction

Solve the math problems and drag the correct answer to each math problem. Write the problems down and solve on paper before choosing the correct answer!

I love using poems and songs to help us remember math!
Use this poem for the **one's place** when solving subtraction.
More on the top, no need to stop!

<u>tens</u>	<u>ones</u>	<u>tens</u>	<u>ones</u>	tens	ones	tens	ones
8	7	9	9	3	7	6	3
-4	3	-2	5	-1	1	-5	2

tens	ones	tens	ones	tens	ones	tens	ones
1	9	2	4	7	8	4	9
-	5	-2	1	-3	6	-1	8

3	11	44	14
74	42	31	26

Here is the next part of the poem:

Number the same, ZEROS the game!

That means if the one's place has the same number, it will always equal 0!
Now try these problems!

I did the first two as an example for you.

<u>tens</u>	<u>ones</u>	<u>tens</u>	<u>ones</u>	tens	ones	tens	ones
8	2	5	9	3	7	8	3
-1	2	-2	9	-1	7	-2	3
7	0	3	0				

tens	ones	tens	ones	tens	ones	tens	ones
1	5	9	4	7	8	6	1
-	5	-	4	-3	8	-1	1

50	60	30	40
70	20	90	10
