

COUNTERACTING FACE SHAPES WITH BROW SHAPING

Drag the brow shape instructions to correct face shape

Round face shape

Square face shape

Oblong face shape

Widen gap between brows with arch further away from centre of brow line

Add length to tails to widen the face, avoiding high arch.

Keep a low to medium soft arch avoiding sharp high angles

Add length to the brows to give the illusion of a slimmer jaw line

Arch nearer to the centre of the brow with height to reduce width.

Soften the curve under the arch to balance harsh lines

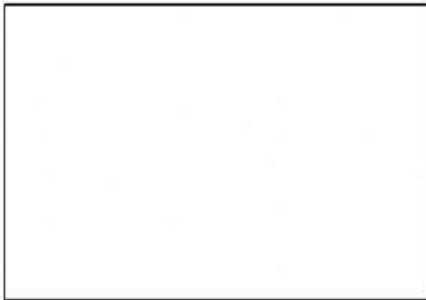

Soft lifted arch, lengthened tail

Add height at the arch to lengthen the face

Arch nearer to the centre of the brow to reduce the width and draw attention to centre

Avoid rounded brows

Heart face shape

Diamond face shape

Pear face shape

Create a curved brow to soften the angles
Medium arch kept closer to centre of the face to prevent widening temple
Decrease the gap between the brows to draw attention to the centre of the face

Keep a soft or curved arch at medium height.
Add length at tails to widen temple
Arch should be towards outside of brows to add width to temple

Keep the brows shorter to narrow forehead to balance the jaw line
Reduce gap between brows to keep eyeline to centre of face.
Arch should be nearer middle of the brows
