

OSA SOUMĚRNOSTI

Rozhodněte, zda jsou obrázky osově souměrné

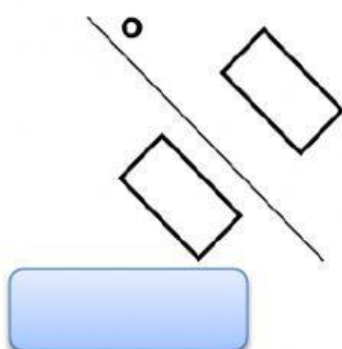

a)

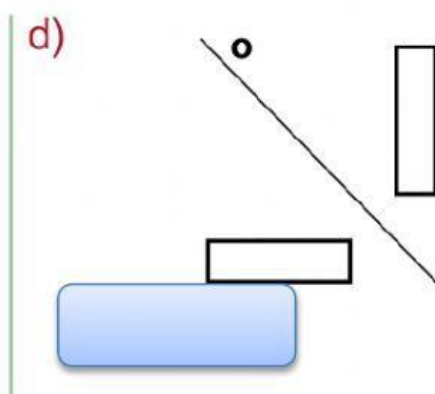

b)

c)

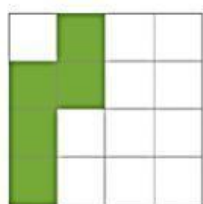

d)

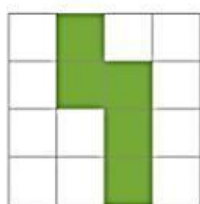

Který obrazec je třeba doplnit do čtvercové sítě, aby vznikl obrazec osově souměrný podle osy o?

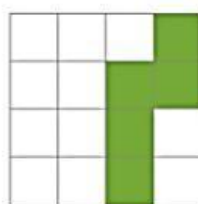

a) ☐

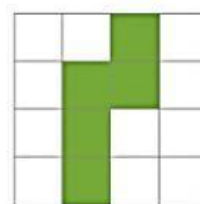

b) ☐

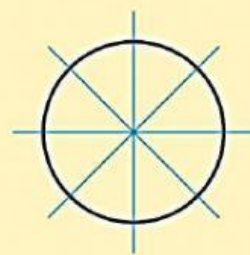

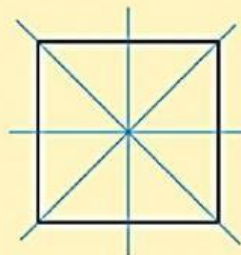

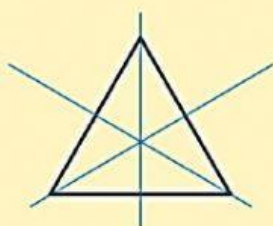

c) ☐

d) ☐

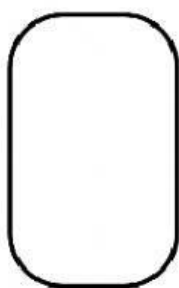

Některé útvary mohou mít více os souměrnosti, např. obdélník, rovnostranný trojúhelník, čtverec, kružnice (u kružnice jsou zobrazeny pouze 4 osy z nekonečně mnoha).

Rozhodněte, kolik os souměrnosti bychom mohli dokreslit.
