

New York City Sights

Statue of Liberty
Central Park

Brooklyn Bridge
Empire State Building

Times Square
The High Line

1. This statue was a gift from France to the USA. It is green and has a woman holding a light.
2. This connects Manhattan to Brooklyn. It is very long. You can walk and drive on it.
3. This is a tall building that was built in 1931 and it was the tallest building in New York. Now it is a popular place to go and see the amazing view.
4. This is a small square famous for its neon signs, electronic billboards and it is also the centre of theatres and cinemas.
5. This is a huge green area in the centre of New York. There are many lakes. In winter the lakes turn into ice and you can skate.
6. It is an old train track from the 1860s. When the train was closed, many plants and grass started to grow there. Then the train track turned into a park and now you can have a walk there, sit on the benches and enjoy the beautiful view.
