STUDENT WORK SHEET

GLOBAL WARMING

Subject Matter : Global Warming
Class/Semester : VII/2nd

Name :
Roll Number :
Class :

A. Place the word that matches the sentence in the column below!

_____ is a form of ecosystem imbalance on earth due to the process of increasing the average of the atmosphere _____, sea and land on earth. The increase in the average temperature of the earth's surface that occurs is due to increased _____ emissions, such as carbon dioxide, methana, dinitro oxide, hydrofluorocarbon, perfluorocarbon, and sulfur heksafluorida in _____. These emissions are mainly generated from the process of burning _____(petroleum and coal) as well as due to deforestation and forest _____.

Greenhouse Gases	Burning	Temperature
Fossil Fuels	Global Warming	Atmosfer

LIVEWORKSHEETS

B. Connect the greenhouse gases that cause global warming with suitable activity that sources it!

CH_4	Much is produced by refrigerators and air conditioners (AC) and perfume sprayers.
CFC	Produced from the breathing of living things and the combustion of organic matter.
N_2O	Produced from burning fossil fuels for electricity generation.
CO_2	Produced from agricultural activities, livestock manure, rice cultivation, and decomposition of organic waste.

C. State what things you can try to overcome global warming that is happening to this earth!

LIVEWORKSHEETS
