

Greta THUNBERG

Greta Thunberg is a climate activist. She's Swedish and she's 20 years old. Greta is unhappy because all the governments are doing too little to fight climate change. Her request is that the Swedish government reduce carbon emissions in accordance with the Paris Agreement.

In 2018, when she was 15, she sat outside the Swedish parliament every day for weeks holding a sign that said: SCHOOL STRIKE FOR THE CLIMATE. At first she was just one person. Then another person joined. And another. Soon, many people joined her. People joined in America, Germany, Japan, India and other places too. People everywhere started to strike.

Since then, she became one of the most famous people in the world. She travels the world and talks to presidents and other leaders. She has won many awards for her work.

She inspired school students across the globe to take part in student strikes.
