102. Endotherm and Ectoderm

Name: **CLASS: 7/**

Q1: Choose the correct answer:

1. Which of the following is correct about birds?
   a. They are Ectotherms b. They are Endotherms
   c. They have hollow bones
2. Which of the following help birds to have less weight?
   a. They lack urinary bladder b. They have feathers
   c. They are vertebrates
3. How hollow bones help the bird?
   a. they can spread their wings b. they fly faster
   c. they have a light wave
4. The opposite bird doesn't fly. Why does it have feathers?
   a. to run faster b. to be unique
   c. to stay warm

Q2: Drag and drop:

Ahlam made a quick note about **bird adaptations**. Let's read what she wrote. Birds have backbones, so they are classified as vertebrates. Instead of arms, birds have wings so all birds can fly. Birds' bones are heavy, like human bones. Heavy bones help them to fly.
