

Topic 27. Fat – soluble vitamins. Antioxidants.

Theoretical questions:

1. General characteristics of vitamins, their classification
2. Exogenic, endogenous hypovitaminosis, the cause of their occurrence
3. Vitamin A: chemical, clinical names, chemical structure, sources in food, daily need, biological role
4. Vitamin D: chemical, clinical names, chemical structure, sources in food, daily need, biological role
5. Vitamin E: chemical, clinical names, chemical structure, sources in food, daily need, biological role
6. Vitamin K: chemical, clinical names, chemical structure, sources in food, daily need, biological role

Study Questions and Tasks

Characteristics of fat-soluble vitamins

Chemical, clinical names	Chemical structure	Sources in food	Daily need	Biological role
Vit A				
Vit D				
Vit E				

Vit K				
-------	--	--	--	--
