Test: First Conditional in Architecture Topics

Directions: Complete each sentence using the first conditional structure (if + present simple, will + base form of the verb). Choose the most appropriate option from the given choices. Write your answers on a separate sheet of paper.

1. If architects design sustainable buildings, _____ energy consumption.
a) they will reduce
b) they reduced
c) they reduce
2. If the construction company finishes the project on time, _____ the client.
a) they will satisfy
b) they satisfied
c) they satisfy
3. If architects incorporate natural lighting, _____ the need for artificial lighting.
a) they will reduce
b) they reduced
c) they reduce
4. If the building has proper insulation, _____ energy-efficient.
a) it will be
b) it is
c) it was
5. If architects use environmentally friendly materials, _____ the carbon footprint.
a) they will reduce
b) they reduced
c) they reduce
6. If the construction team follows safety protocols, _____ accidents on the site.

- a) there will be fewer
- b) there are fewer
- c) there were fewer

7. If the design is aesthetically pleasing, _____ the overall appeal of the building.

- a) it will enhance
- b) it enhanced
- c) it enhances

8. If architects consider the local climate, _____ energy for heating and cooling.

- a) they will save
- b) they saved
- c) they save

9. If the building complies with accessibility standards, _____ inclusive for everyone.

- a) it will be
- b) it is
- c) it was

10. If architects integrate green spaces, _____ the quality of life for the occupants.

- a) they will improve
- b) they improved
- c) they improve

11. If the structural calculations are accurate, _____ any structural failures.

- a) there won't be
- b) there wasn't
- c) there isn't

12. If the construction workers follow the design plans, _____ deviations in the final result.

- a) there won't be any
- b) there weren't any
- c) there aren't any

13. If the building is properly maintained, _____ its lifespan.

- a) it will prolong
- b) it prolonged

c) it prolongs
