

1. Observe the given waves 'A' and 'B' and answer the questions.

- Which wave is of LARGER wavelength? _____
- Which wave is of SHORTER wavelength? _____
- Which wave has HIGHER amplitude? _____
- Which wave is of LOWER frequency? _____
- Which wave has frequency 4 Hz? _____
- Which wave has frequency 6 Hz? _____

2. Carefully observe the three waves given and answer the questions.

- Which wave has LEAST frequency? _____
- Which wave has HIGHEST frequency? _____
- Which wave has HIGHEST amplitude? _____
- Which wave has the most vibrations per second? _____
