But then something happened, and I began playing truant from school and finally fell (41)\_\_\_\_\_ the class. My parents were worried sick about me and assumed that I would be expelled from school because of my poor attendance and low academic performance. And they were forced to make a hard decision: no financial support till I resit all my tests.

I had a really tough time, studying (42)\_\_\_\_\_ to catch up and to live (43)\_\_\_\_\_ their expectations.

### Choosing a Career

Choosing the right career can be the most important decision I must make this year. For most of (49)\_\_\_\_\_ school-leavers, it's not a problem at all. But I'm still in two minds.

I see (50)\_\_\_\_\_ as a famous actor or a singer, but my dad says that neither singing (51)\_\_\_\_\_ acting will help me maintain my family. He wants me to have a steady job with a future. And it looks like we will never understand each (52)\_\_\_\_\_.

That's why next week, I'm visiting a career counsellor as I hope she might help me get a better idea about what kind of job suits me. I will definitely listen to her suggestions, but the decision will be (53)\_\_\_\_\_. And the only thing I know for sure is that if you have a plan for your career, you'll choose jobs that push your skill sets towards your long-term objectives and foster your relationships with key people.

## Floating School

What does your school look like? A typical three-storey building with a large schoolyard? Or a square-shaped one with an interior court? And classrooms with three rows of (54)\_\_\_\_\_ desks facing the teacher's desk and the blackboard? And would you like to attend a boat school?

Ulushi is a nine-year-old schoolgirl in Bangladesh who has her lessons on the boat deck. Without such schools, she would (55)\_\_\_\_\_ to take a five (56)\_\_\_\_\_ walk together with a friend of hers. And she (57)\_\_\_\_\_ have missed out on her education during last spring's monsoon floods.

It's as plain as day that if schoolchildren can't reach their school, their classroom should go to them. That is why the boat first picks up the students from their riverside stops, and once they have docked, the classes begin.

Around two-thirds of the country's primary schoolchildren study at floating schools on the boats built in the (58)\_\_\_\_\_.
