

Isilah kolom kosong di bawah ini dan pasangkanlah (Drag) jawaban di bagian bawah dengan kotak yang di siapkan di akhir jawaban di tiap nomor soalnya!

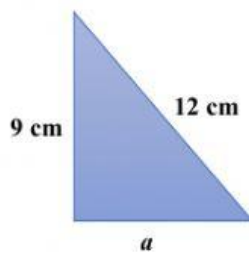

Contoh:

$$\begin{aligned} x^2 &= \sqrt{5^2 + 7^2} \\ &= \sqrt{25 + 49} \\ &= \sqrt{74} \\ &= 8,60 \text{ cm} \end{aligned}$$

8,60 cm

Tulis dua angka di belakang tanda koma,
Gunakan tanda koma bukan titik ya...

$$\begin{aligned} a^2 &= \sqrt{12^2 - 9^2} \\ &= \sqrt{144 - 81} \\ &= \sqrt{63} \\ &= 7,94 \text{ cm} \end{aligned}$$

7,94 cm

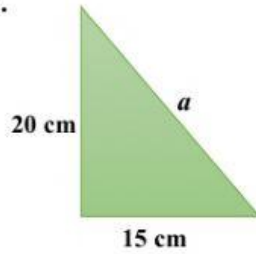

10 cm

14,4 cm

22,36 cm

25 cm

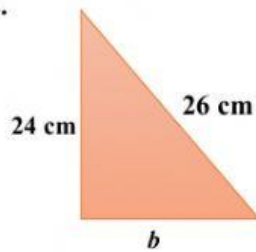

1.

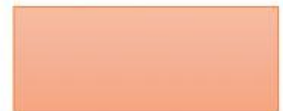

$$\begin{aligned} &= \sqrt{20^2 + 15^2} \\ &= \sqrt{400 + 225} \\ &= \sqrt{625} \\ &= 25 \text{ cm} \end{aligned}$$

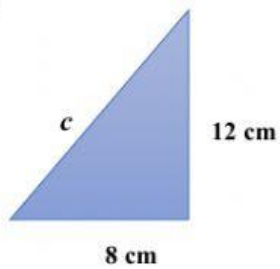

2.

$$\begin{aligned} &= \sqrt{24^2 + b^2} \\ &= \sqrt{576 + b^2} \\ &= \sqrt{676} \\ &= 26 \text{ cm} \end{aligned}$$

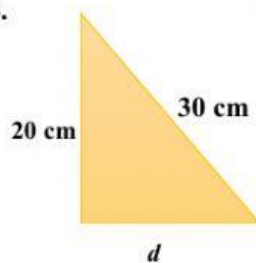

3.

$$\begin{aligned} &= \sqrt{12^2 + 8^2} \\ &= \sqrt{144 + 64} \\ &= \sqrt{208} \\ &= 14,4 \text{ cm} \end{aligned}$$

4.

$$\begin{aligned} &= \sqrt{20^2 + d^2} \\ &= \sqrt{400 + d^2} \\ &= \sqrt{900} \\ &= 30 \text{ cm} \end{aligned}$$
