

PART - II BIOLOGY LIVE WORKSHEET BS 16

- The dry skinned and spiny exoskeleton animal can be seen in..... ()
 - Forest ecosystem
 - Bracelet ecosystem
 - Desert ecosystem
 - Pond ecosystem
- The forests that grow near the backwaters of the sea..... ()
 - Teak forest
 - Evergreen forest
 - Deciduous forest
 - Mangrove forest
- The world ecosystem was coined by..... ()
 - A.G. Tansley
 - Hackel
 - Aristotle
 - Robert hooke
- Living organisms that decompose dead animals and plants are called ()
 - Producers
 - Consumer
 - Decomposers
 - None
- The food Web starts from ()
 - Animals
 - Plants
 - Bacteria
 - Fungi
- Approximately the solar energy absorbed in the atmosphere is ()
 - 57%
 - 59%
 - 60%
 - 40%
- Example for Succulent plant. ()
 - Neem
 - Banyan
 - Pistia
 - Cactus

8. 'Detritus' is a ()

- 1) Fungus
2) Algae
3) Carnivore
4) Decomposing bacteria

9. Aestivation can be seen in ()

- 1) Summer
3) Spring
- 2) Winter
4) Autumn

10. Which one of the following acts as primary as well as secondary consumer in the forest ecosystem? ()

- 1) Rabbit**
- 2)Deer**
- 3)Man**
- 4)Lion**
