Revision - Wh- questions 1

a) Read this:

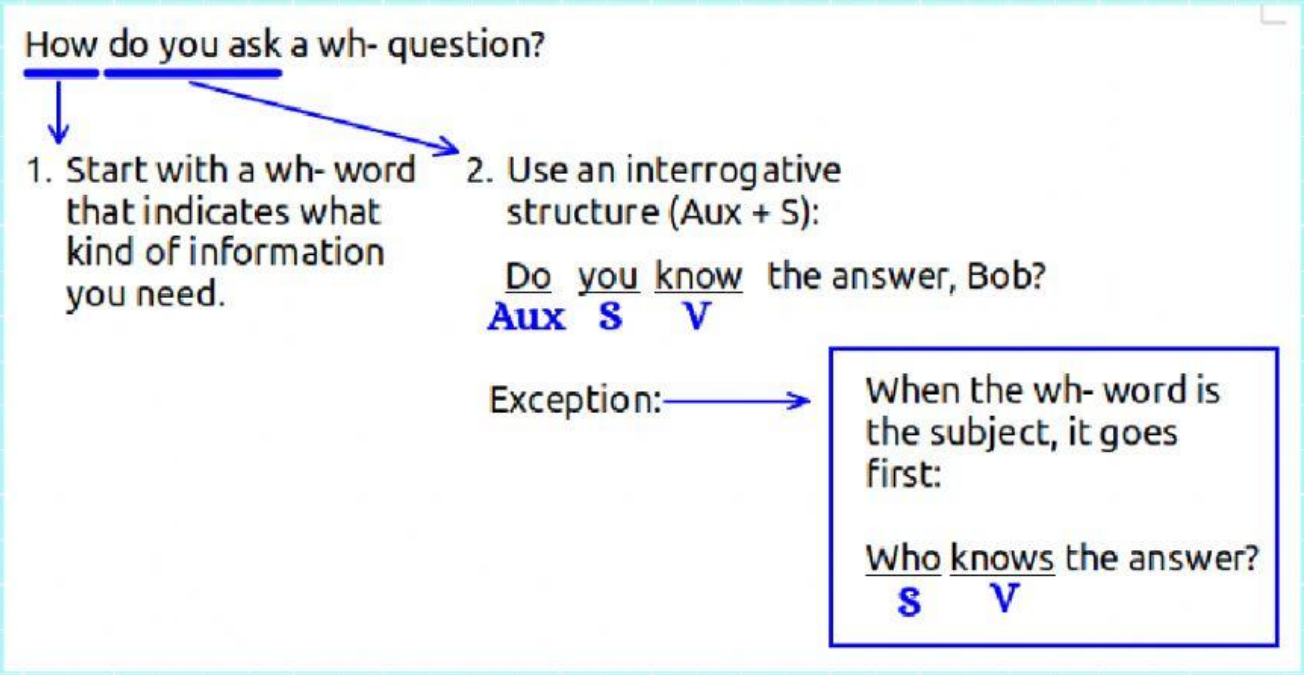

When you cannot hear or cannot understand something, you have two options: 1. Asking "Sorry?" 2. Asking a wh- question If you ask "Sorry?", the person who is talking to you will repeat the whole sentence, and often it will be equally difficult to understand. If you ask a wh- question, the person who is talking to you will repeat only the information that you need, often more clearly or more loudly than the first time, so a wh- question is much more effective.	

b) Read this:

Yes/no questions allow you to check something that you think is true, or that you are not sure about: Is that your brother? Have you done your homework? Wh- questions give you specific information that you do not know: What time is it? What homework do you have?
