Creating a process

Read the sentences and drag the picture to the correct place

Then, make sure you add all relevant information, photos, prices, data etc.

Finally, launch your site and enjoy to benefits of having one!

Second, customize your site. Add valuable information and navigation aspects

First, choose the best platform to host your website

After that, Add a logo

Once the logo and all the information is loaded on your site, preview, test and analyze if the site fulfills your
