Mobile technology has revolutionized language learning, allowing learners to access language learning (1)…… anytime and anywhere through language learning apps, online resources, and mobile devices.

However, learners may face challenges, such as the lack of personal (2)……, insufficient feedback and support, technical difficulties, (3)……, limited access to real-life language use, digital divide, and lack of cultural context.

To overcome these obstacles, language learners can use a variety of (4)…… and learning methods, supplementing mobile technology with other approaches as needed. Language learning app developers can also improve their apps by adding (5)…… elements and immersive experiences. With careful planning and the right approach, mobile technology can enhance language learning and help learners achieve their language learning goals.
