choose the correct alternative

Everybody wants to know what the future **will look/looks** like, and it's curious because we generally ignore what **is happening/ happens/is going to happen** in the next five minutes. Yet, let's try to think about two things and let's see if they **change/will change/ are changing** or not.

My first topic is cars. **Are we having/Will we have/Do we have** flying cars as we see in most of the science fiction movies? Some great car industries **develop/are developing/is going to develop** more and more powerful engines and they often say they **are going to launch/are launching/launch** a flying car on the market, but I don't think they **will succeed/are succeeding/ are going to succeed/succeed** in doing it! It's too expensive!

My second topic is aliens. **Will we meet/Do we meet** aliens in the future? First of all we should know if aliens exist. And if Aliens **exist/will exist/are existing** will they want to meet us? If they come from a superior civilization, I don't think they **want/will want /are wanting** to meet us. And if their civilization is inferior to ours, how **will they get/are they getting/do they get** into contact with us? So, I don't think the world in 20 years will be very different from today!
