

Draw a line to the correct name of the fraction.

The image shows a large green tree with a brown trunk. Several beehives are hanging from the branches. Bees are flying around the tree, each carrying a yellow box with a fraction. The boxes are connected to the tree by lines, indicating the correct name of the fraction.

Fractions and their corresponding names on the tree:

- $\frac{9}{9}$ is connected to "nine-ninths".
- $\frac{12}{8}$ is connected to "three-halves".
- $\frac{7}{6}$ is connected to "seven-sixths".
- $\frac{3}{3}$ is connected to "three-thirds".
- $\frac{14}{14}$ is connected to "fourteen-fourteenths".
- $\frac{15}{2}$ is connected to "seven-and-a-half".
- $\frac{5}{2}$ is connected to "two-and-a-half".
- $\frac{10}{10}$ is connected to "ten-tenths".
- $\frac{17}{17}$ is connected to "seventeen-seventeenths".
- $\frac{16}{15}$ is connected to "one-and-one-fifth".

Names on the tree:

- nine-ninths
- three-halves
- seven-sixths
- three-thirds
- fourteen-fourteenths
- ten-tenths
- seventeen-seventeenths
- one-and-one-fifth
- two-and-a-half
- seven-and-a-half

$\frac{7}{6}$

nine-ninths
