Answer each question about the rock cycle.

1. What kind of rock forms from sediments?
  - a. Igneous Rock
  - b. Sedimentary Rock
  - c. Metamorphic Rock
  
2. What kind of rock forms from cooling and hardening?
  - a. Igneous Rock
  - b. Sedimentary Rock
  - c. Metamorphic Rock
  
3. What kind of rock forms from heat and pressure?
  - a. Igneous Rock
  - b. Sedimentary Rock
  - c. Metamorphic Rock
  
4. Crystals and ribbonlike layers are characteristics of
  - a. Igneous Rock
  - b. Sedimentary Rock
  - c. Metamorphic Rock
  
5. Gas bubbles and glassy surface are characteristics of
  - a. Igneous Rock
  - b. Sedimentary Rock
  - c. Metamorphic Rock
  
6. Fossils and sand/pebbles are characteristics of
  - a. Igneous Rock
  - b. Sedimentary Rock
  - c. Metamorphic Rock
