

Drag the activities in the correct column:

Donate the toys or clothes you are not longer going to use

Say "no" to a plastic straw when out to eat

Put the plastic, paper and glass in the correct container

Give a second life to your old electronics

reuse discarded objects in such a way to create a product of higher quality or something different than the value of the original.

Take reusable bags to carry your purchases home

REMEMBER...

The three R's rule, which stands for Reduce, Reuse and Recycle, is a way to take care of the environment by generating less waste, saving money and being a more responsible consumer.

Much emphasis has been placed on recycling, and it is true that it is very important, but it is also important to generate less rubbish and waste, and that is what the first two R's help us to do: reduce and reuse.

A lot of rubbish is still incinerated or goes to landfill and this is a source of pollution and environmental degradation that we can all work together to stop.
