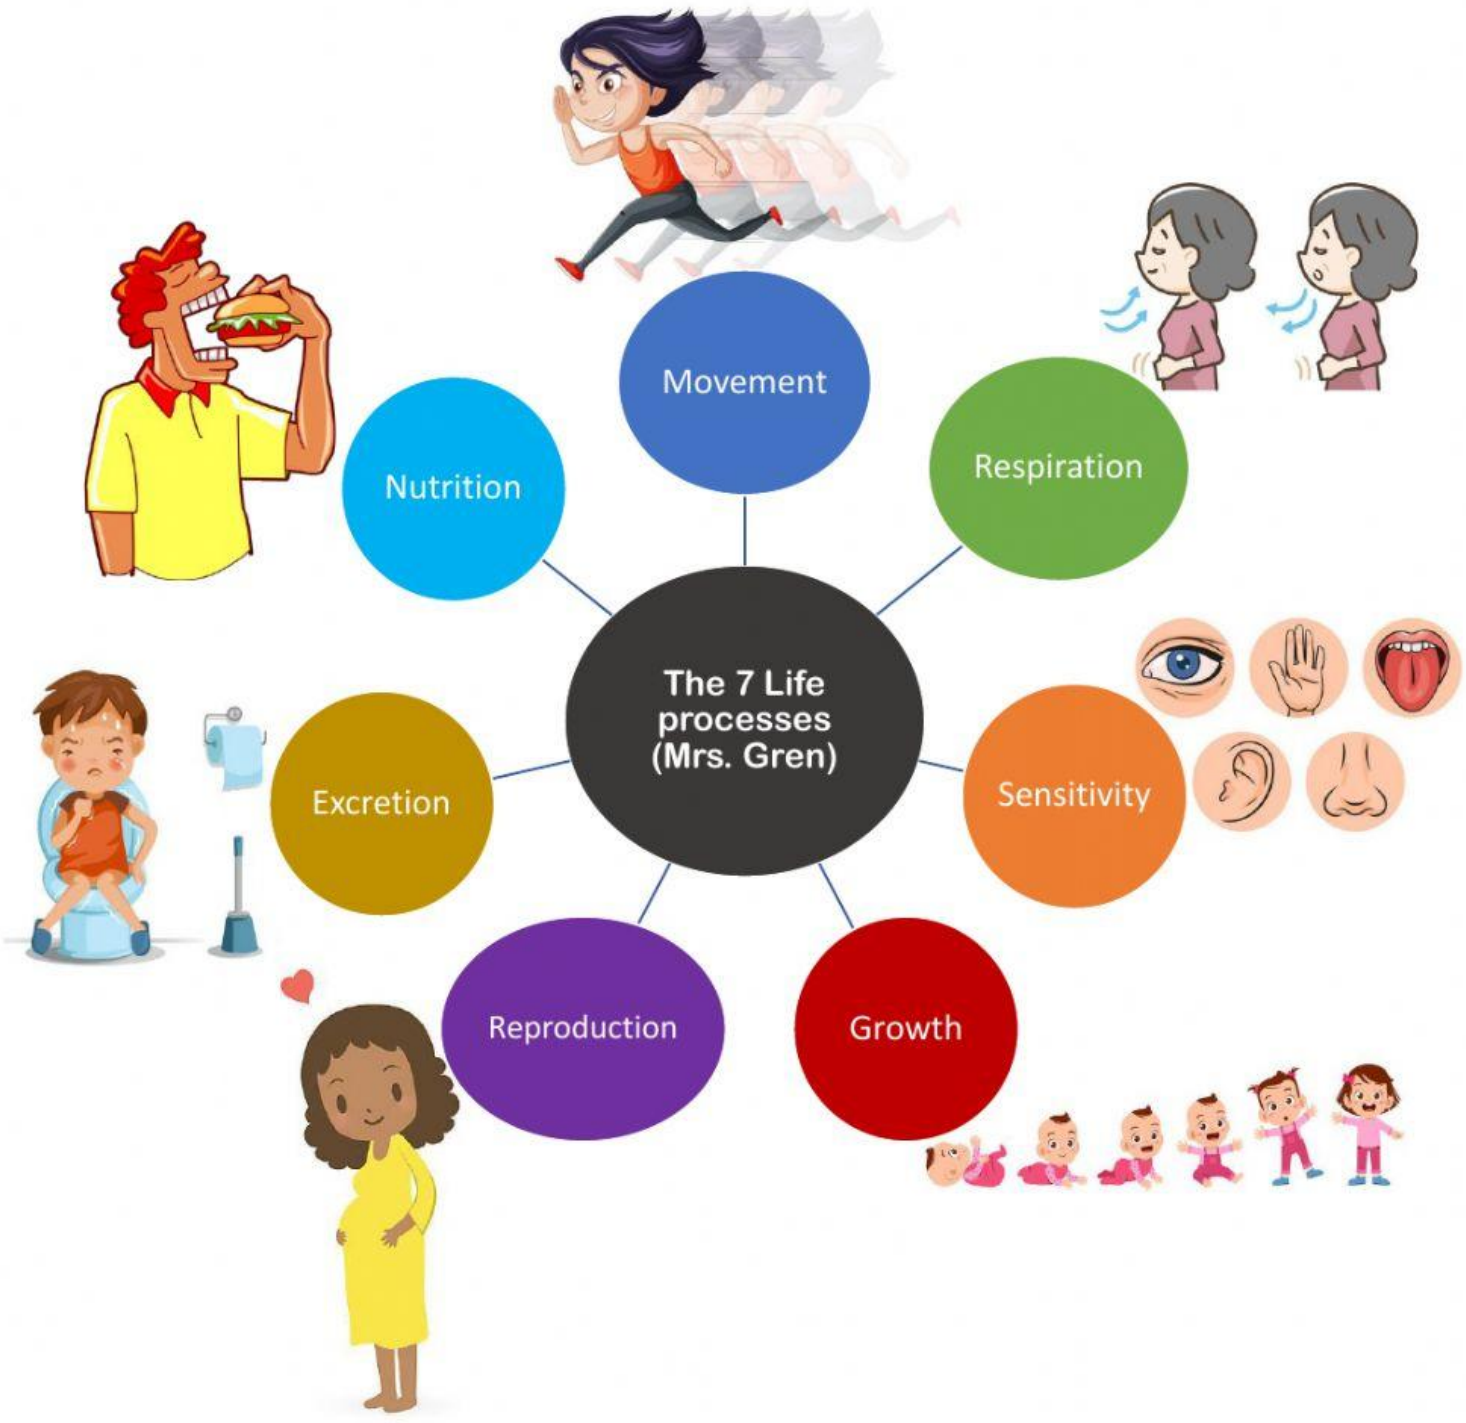
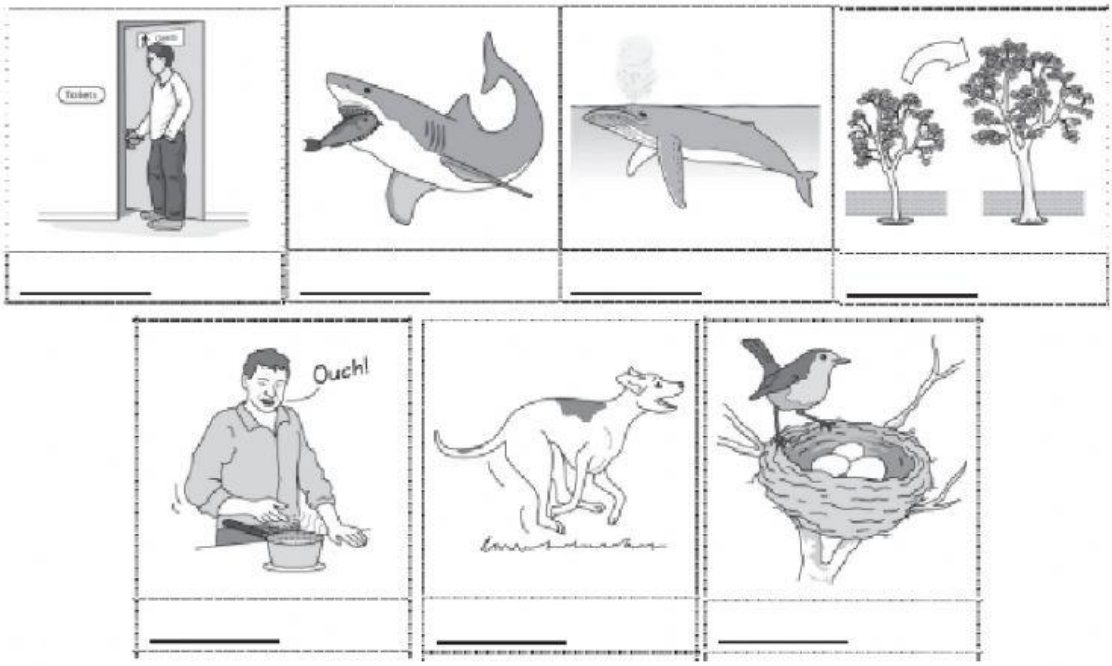
Life processes:

All living things must be able to do all seven life processes.



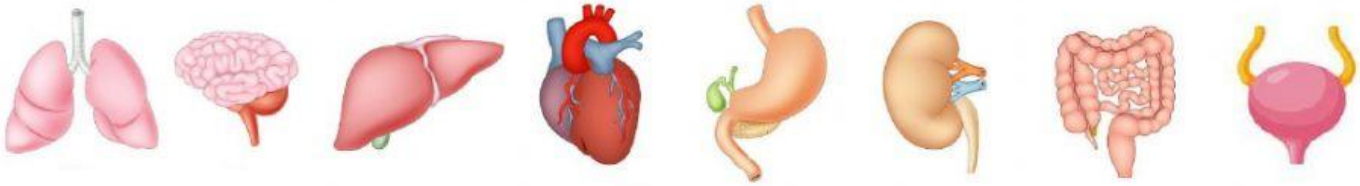
Drag and drop the life processes below to show which one is shown in each picture.

Movement | Respiration | Sensitivity | Growth | Reproduction | Excretion | Nutrition



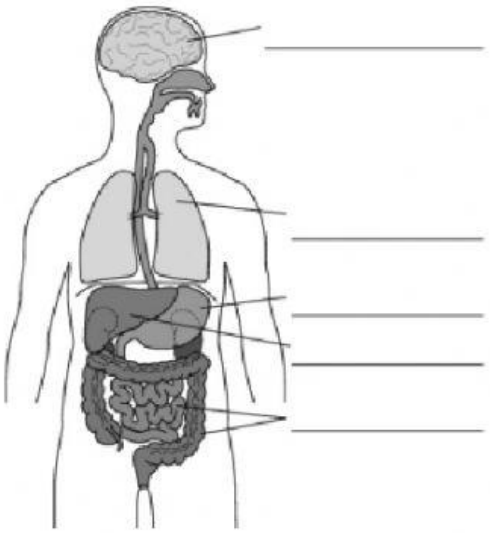
Match each organ name with its picture:

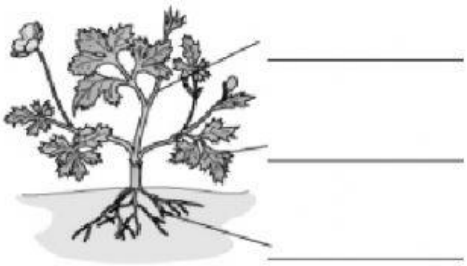
Liver | Kidney | Stomach | Heart | Lungs | Bladder | Brain | Intestines



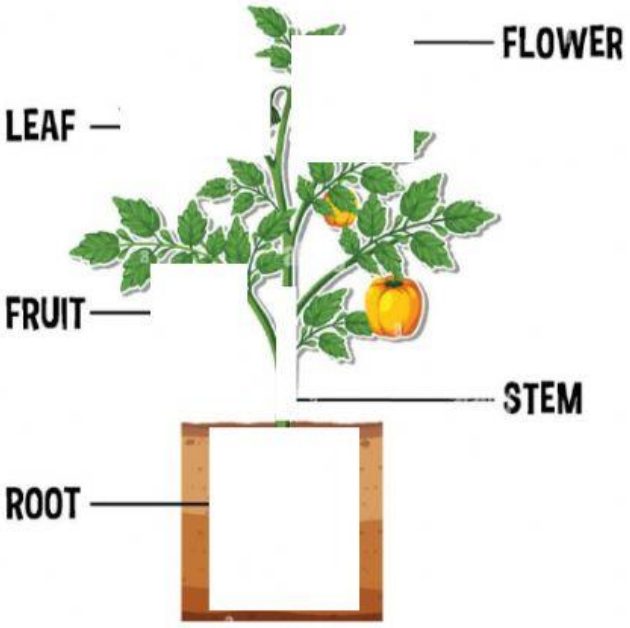
Drag the label below and drop them where they belong:

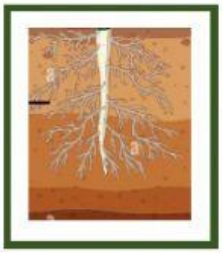
brain	intestines	leaf	liver	lung	root	stem	stomach



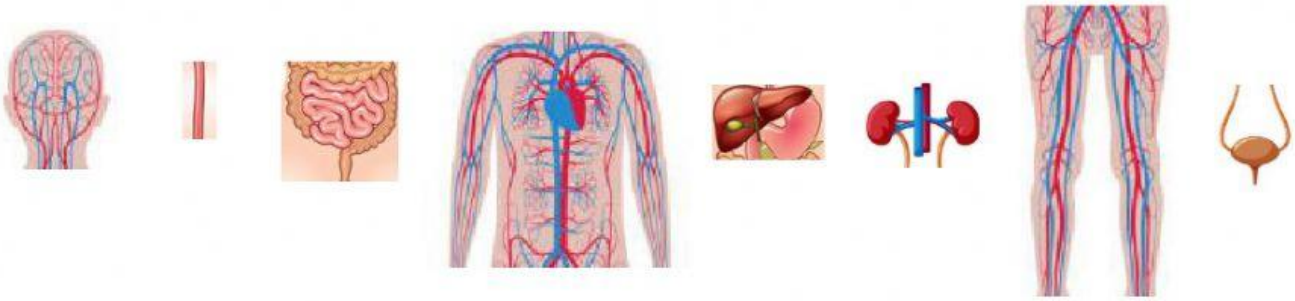


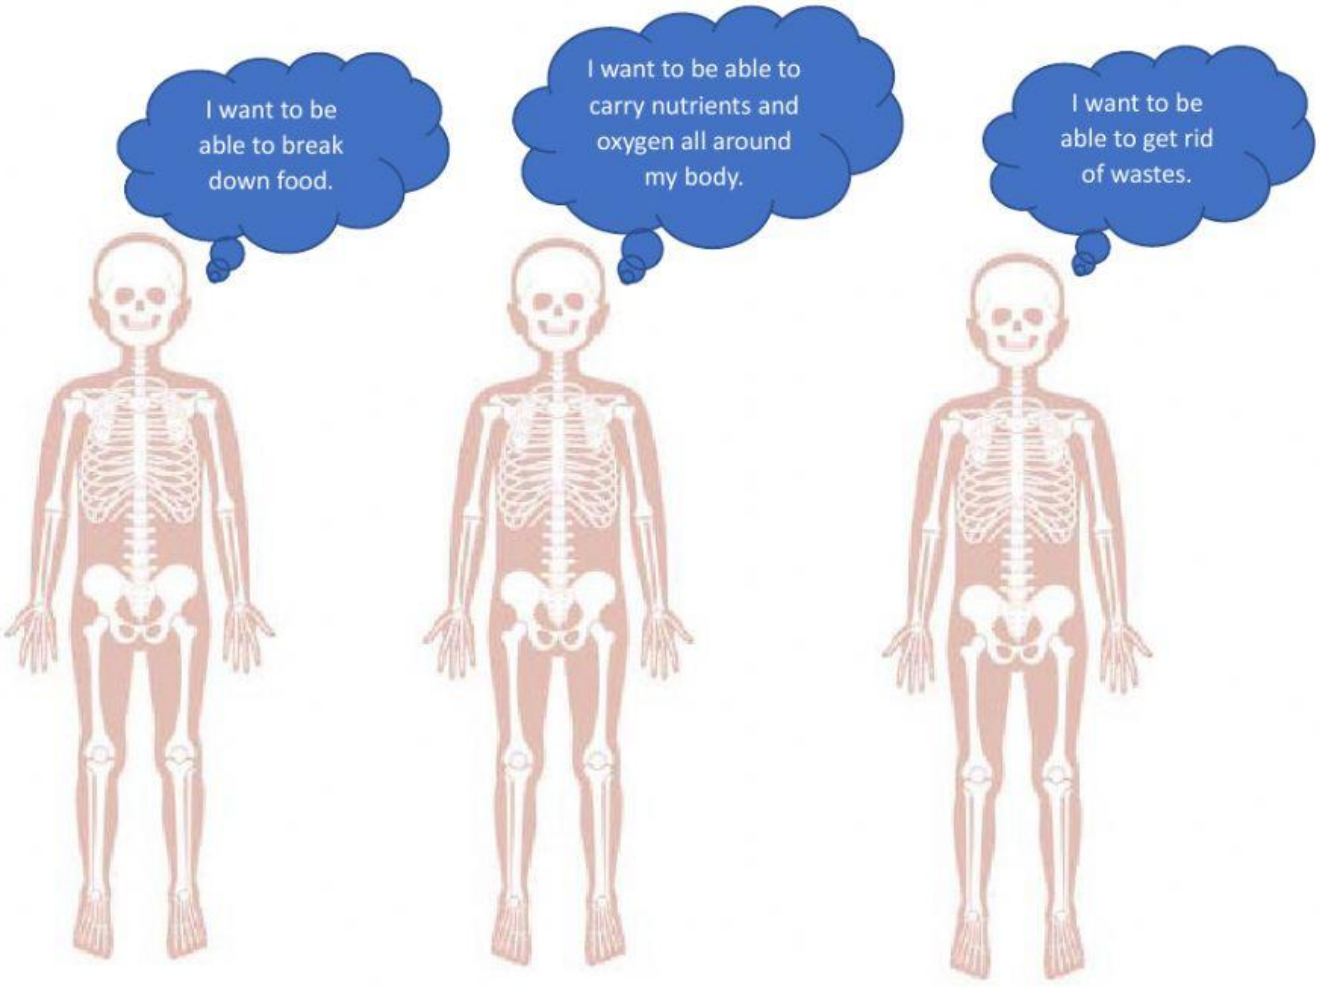
Arrange the plants organs below into a plant (organism).



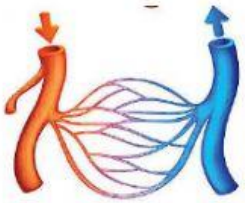


Look at the three skeletons below and help them find the appropriate organs to do their desired function by dragging and dropping the suggested organs:

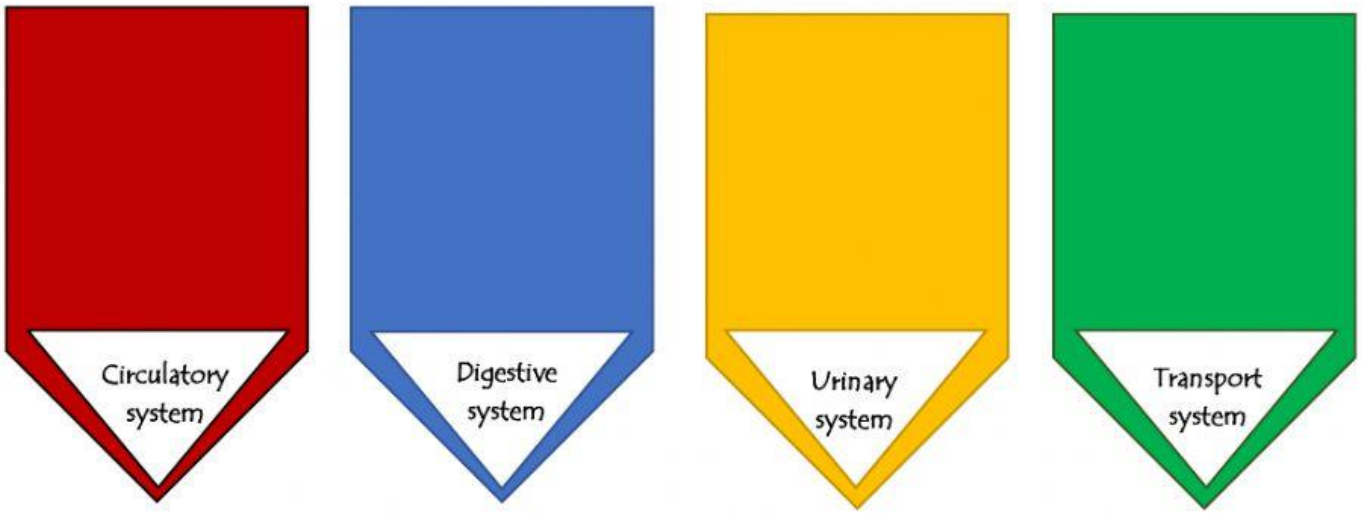




Complete the organ systems by dragging each of the suggested organs and dropping them into their assigned box.

			Heart	Liver	Bladder	Ribs
			
Kidneys	Lungs	Intestines	Roots
			


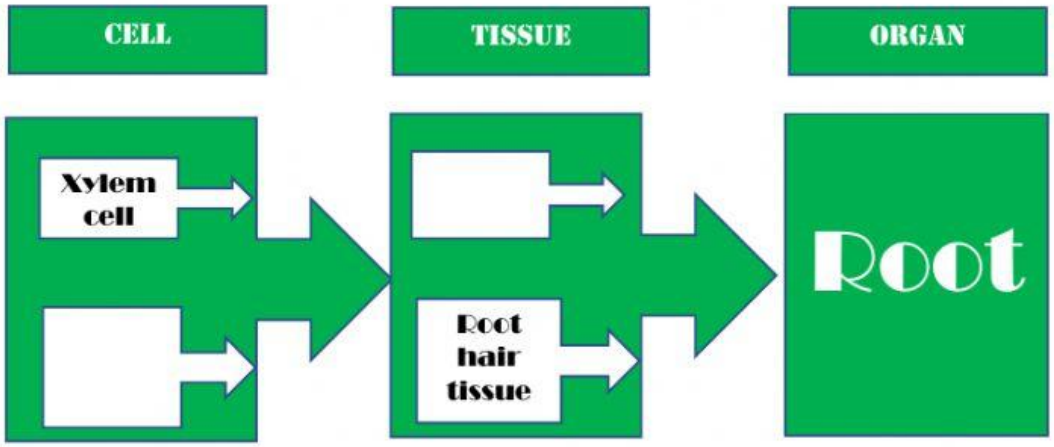
Diaphragm	Blood vessels	Stem	Stomach

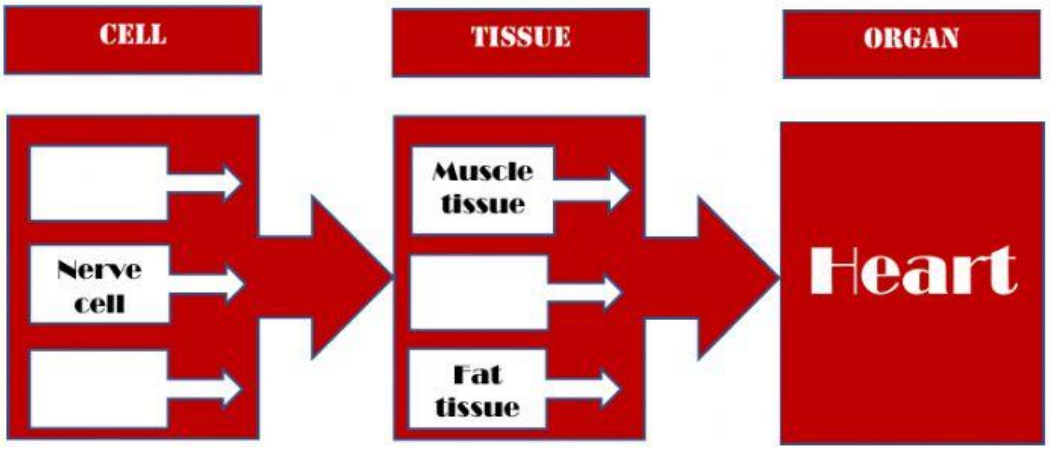


Draw lines to match the organ with its name and its job. The first organ has been done for you.

Picture	Name	Job
	lungs	controls the body
	brain	gets oxygen into the blood
	liver	pumps blood
	leaf	makes food
	heart	makes and destroys substances
	intestines	breaks up food
	stomach	breaks up food and takes it into the blood

Type the appropriate cell and tissue to make each of the organs below:

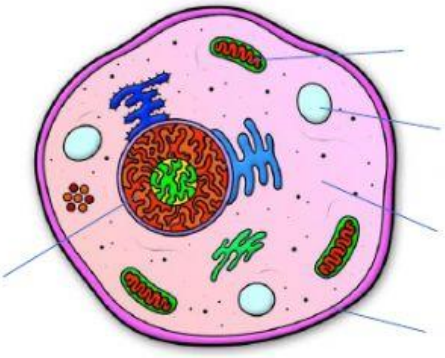


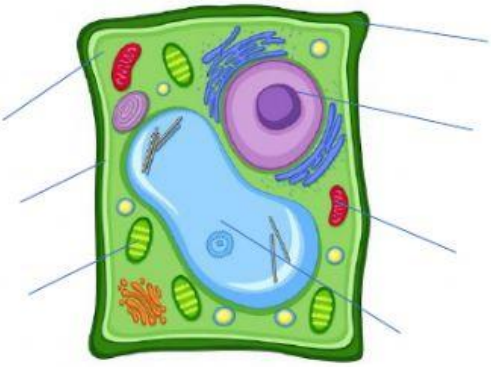


Drop the correct label at each of the boxes below to label the cells:

Mitochondria | Nucleus | Small vacuole | Cell membrane | Large vacuole | Mitochondria

Cytoplasm | Cell wall | Nucleus | Cytoplasm | Chloroplast | Cell membrane





Match the organelles below with their functions:

cell surface membrane	where the cell's activities happen
cell wall	where energy is released from respiration
chloroplast	where plant cells make their food
cytoplasm	a cellulose box that helps support the cell
mitochondria	a thin bag that controls what goes into and out of the cell
nucleus	storage space
vacuole	the 'control centre' of the cell

Help the students below examine their specimen using a microscope by choosing the steps and arranging them in the right order:

1.
2.
3.
4.
5.
