DIFFERENCE BETWEEN ENGLISH SYSTEM OF MEASUREMENT AND METRIC SYSTEM

<u>English system of measurement</u>	<u>Metric system</u>
English system of measurement is harder than metric system.	Metric system is easier than English system of measurement.
This system is based on common length of body parts.	This system is easy to manipulate because all conversion are based on multiple of ten.
English system of measurement created in US.	Metric system created in France.
The English system of measurement uses feet, inches and pounds for measuring the things.	The metric system uses most of the unit meter and gram and prefixes like kilo , Millis ,and centi to count order of magnitude.
English system of measurement is designed to increase difficulty of measuring length.	Metric system is dull all measurement is in power of ten.
Example of English system of measurement are :- 1) Area are given in square feet. 2) Area are given in square yard.	Example of metric system are :- 1) The thickness or length of credit card. 2) Length of cloth. 3) Our own body weight. 4) Measuring the amount of water in the tank.
