

Water Cycle

Direction: Drag the name of the stage next to the description.

	Water turns into gas.
	Water returns to earth. Some of this water makes its way back to rivers and oceans.
	Some plants release water into the atmosphere as vapor.
	Some water ends up in the soil.
	Water vapor turns into liquid.
	Water falls from the clouds as rain or snow.

Condensation

Evaporation

Precipitation

Runoff

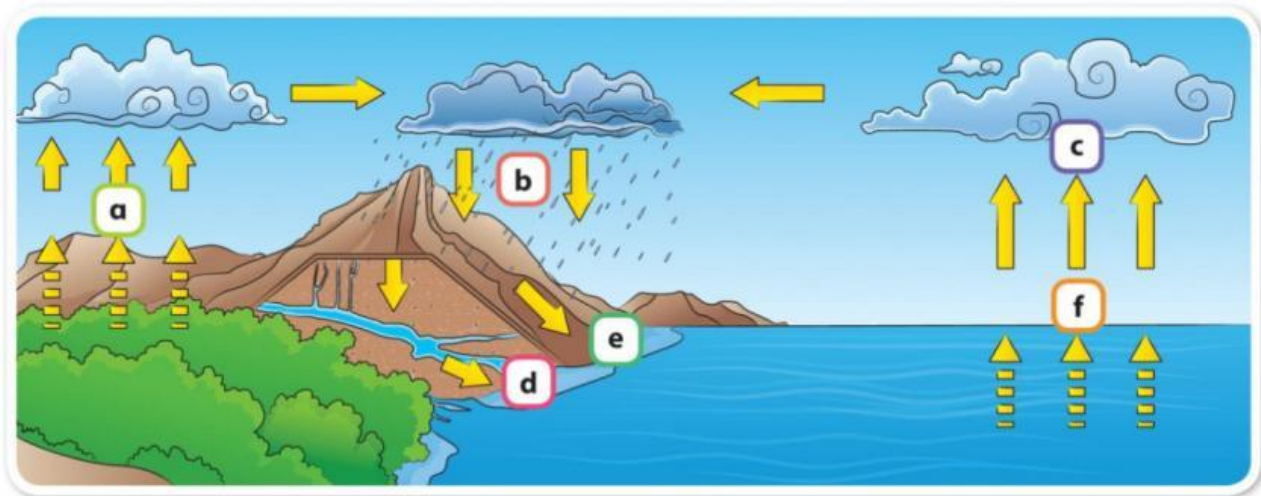

Infiltration

Transpiration

Water Cycle

Name each stage of the water cycle.

Condensation	Evaporation	Runoff	Precipitation	Infiltration	Transpiration
--------------	-------------	--------	---------------	--------------	---------------

A.

D.

B.

E.

C.

F.
