# Probability

Here is a Jar different colored marbles. A marble selected at random. Find the Probability of getting.

Write the Numerator and Denominator for Probability

$$P(Blue) = \frac{\phantom{00}}{\phantom{00}}$$

$$P(Green) = \frac{\phantom{00}}{\phantom{00}}$$

$$P(Black) = \frac{\phantom{00}}{\phantom{00}}$$

$$P(Red) = \frac{\phantom{00}}{\phantom{00}}$$

$$P(Green) = \frac{\phantom{00}}{\phantom{00}}$$

$$P(Yellow) = \frac{\phantom{00}}{\phantom{00}}$$

$$P(Blue) = \frac{\phantom{00}}{\phantom{00}}$$

$$P(Not Red) = \frac{\phantom{00}}{\phantom{00}}$$
