

NAME: _____ **GRADE 1-** _____ **DATE:** _____

LO: Identify different types of rocks.

		
These rocks are formed when sediments like sand, mud and pebbles are squashed in the ocean, lakes or desert.	These rocks are formed when magma cools and become solid.	These are rocks that have been changed by heat or pressure, or both.

IGNEOUS ROCKS	SEDIMENTARY ROCKS	METAMORPHIC ROCKS
----------------------	--------------------------	--------------------------

TASK 2: Group the following rocks to its correct type.

Slate	Pumice	Conglomerate
1. Igneous		
2. Sedimentary		
3. Metamorphic
