

Unit, Lesson 2

The Heart

Instructions: Drag the steps (found below) into their correct box to show how blood is circulated around the body.

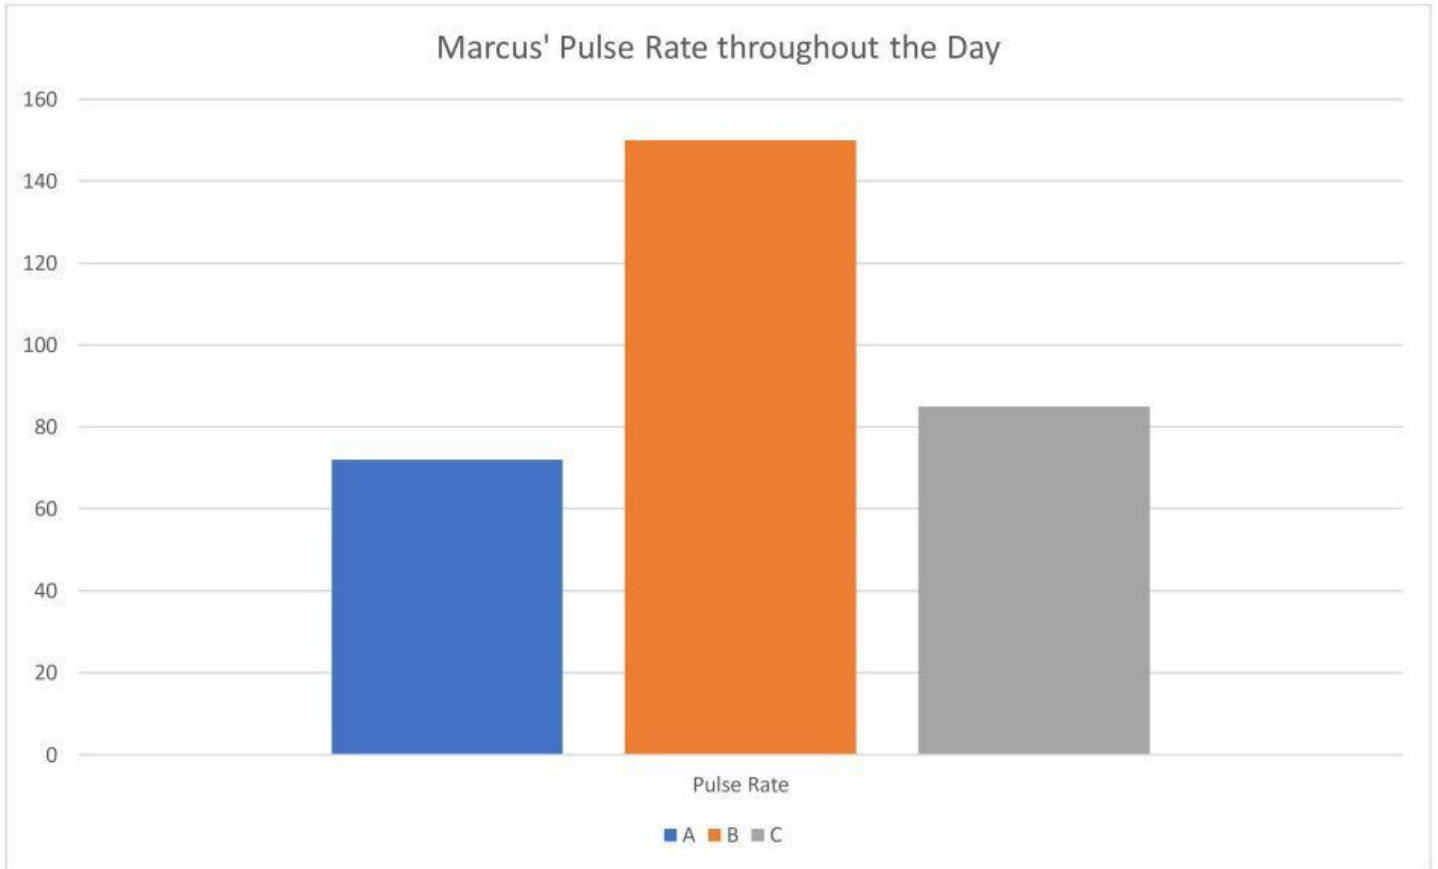

The right side of the heart pumps blood to the lungs.	The lungs give oxygen to the blood.
The left side of the heart pumps blood to the body.	The blood flows back to the right side of the heart.

Unit, Lesson 3

Heartbeat and Pulse

Study the graph, then answer the following questions.

1. Which is Marcus' Pulse rate while he is sitting still?
2. Marcus got tired the most after playing football. Which do you think represents his pulse rate while playing football?
3. Marcus also did some digging in the garden, which one represents his pulse rate while digging?
