

Name: _____ Hour: _____

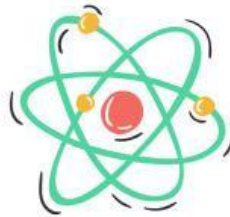

Proteins vs. Nucleic Acids

What Elements Make Up These Macromolecules?

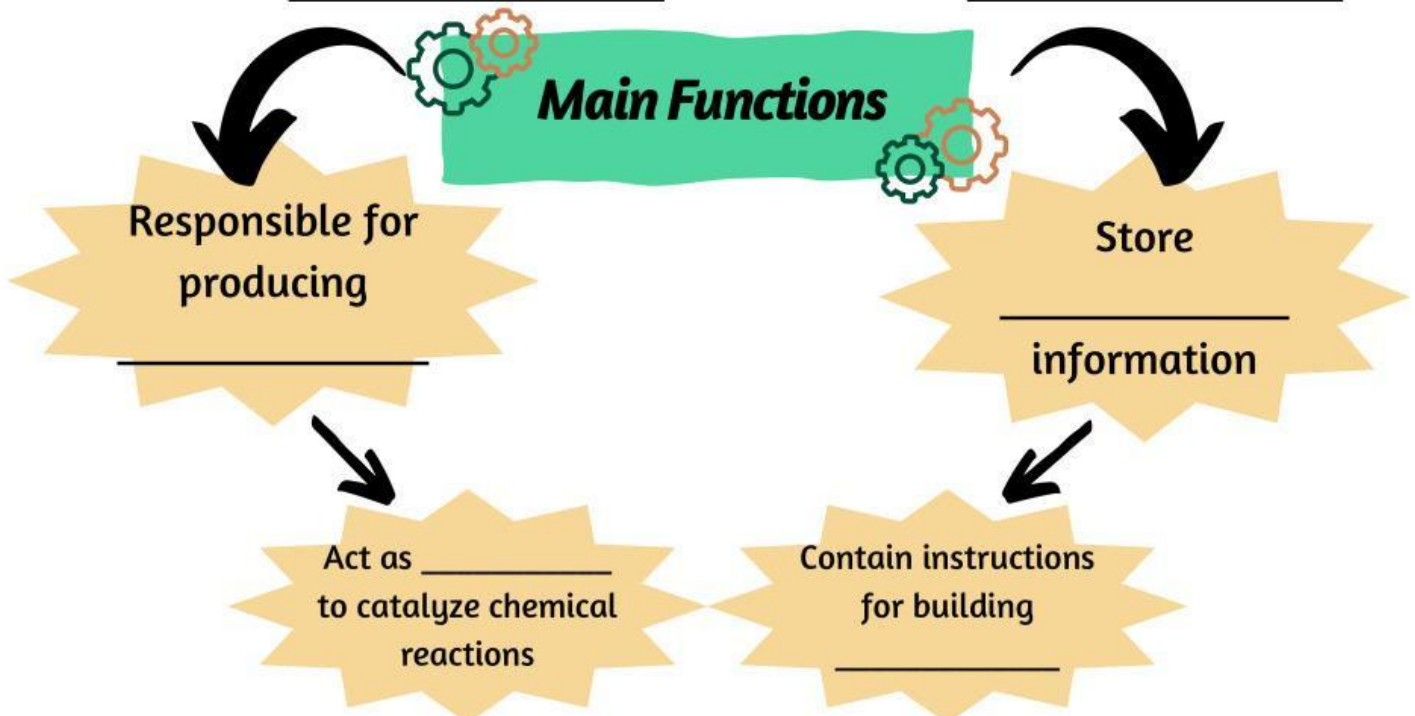

Proteins:

Nucleic Acids:

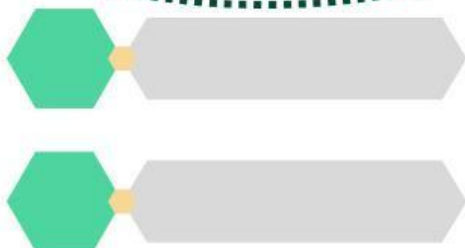

**Protein
Monomer:** _____

**Nucleic Acid
Monomer:** _____

Examples of Proteins

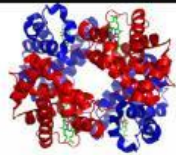

Examples of Nucleic Acids

Researching the Macromolecules

In the table below, identify each type of macromolecule (**protein or nucleic acid**) and determine the function (**transport/movement, enzyme, store genetic information, or instructions for building proteins**). Use Google to help you research the information.

Name	Type of Macromolecule	Function	Image
Hemoglobin			
Deoxyribonucleic Acid (DNA)			
Ribonucleic Acid (RNA)			
Albumin			
Lactase
