Grade 12 Adv. **Worksheet**

8 **Distinguishing facts from assumptions** For each statement, write fact or assumption, according to the presentation of information in the reading selection *The Human Brain*. (You'll need to look back at the reading text for words that indicate fact or assumption.)

1. There's no doubt that the left hemisphere is different to the right hemisphere.

2. A person isn't just "left-brained" or "right-brained".

3. The myth of left-brain and right-brain is due to scientific research conducted in the past.

4. A logical activity and an artistic activity require both brain hemispheres to be active.

5. Over 700 cases have been filed that are based on newly discovered memories.

6. Many newly discovered memories are false.

7. Small pieces of memory are kept in different parts of the brain.

8. People "remember" things that have never happened.

9. There is no structural difference between a false memory and a true one.

10. The brain of a teenager differs from that of both children and adults.
