

1. What is lymph?

- | | | | |
|----------------------------|--|----------------------------|---|
| ☐ A | C. A fluid made from white blood cells and chyle | ☐ B | B. A fluid made from red blood cells and chyle |
| ☐ C | D. A fluid made from white blood cells and red blood cells | ☐ D | A. A fluid made from white blood cells, some red blood cells, and chyle |

2. What are lymphatic capillaries?

- | | | | |
|----------------------------|--|----------------------------|---|
| ☐ A | B. Fine capillaries that collect excess fluid from blood capillaries | ☐ B | A. Fine capillaries that collect excess fluid from body tissues |
| ☐ C | D. Fine capillaries that collect excess fluid from lymphatic vessels | ☐ D | C. Fine capillaries that collect excess fluid from lymph nodes |

3. What is the function of lymphatic nodes?

- | | | | |
|----------------------------|-------------------------------|----------------------------|---------------------------------|
| ☐ A | A. To filter the blood | ☐ B | C. To produce white blood cells |
| ☐ C | D. To produce red blood cells | ☐ D | B. To filter the lymph |

4. How does the lymphatic system create a flow of lymph?

- | | | | |
|----------------------------|---|----------------------------|--|
| ☐ A | D. By relying on the heart's pumping action | ☐ B | A. By relying on pressure from muscle contractions |
| ☐ C | B. By relying on a pump similar to the circulatory system | ☐ D | C. By relying on gravity |

5. Where does the lymph pass into the bloodstream?

- | | | | |
|----------------------------|---------------------------------|----------------------------|------------------------------------|
| ☐ A | B. Aorta and vena cava | ☐ B | D. Coronary arteries and veins ? |
| ☐ C | C. Pulmonary arteries and veins | ☐ D | A. Left and right subclavian veins |
