

Name :

Quarter 1

Grade 7:

Date :

Activity : Word Problems Involving sets

A. Direction: Read and analyze each problem. Solve for the unknowns by completing the indicated spaces that describe the cardinality of the following sets.

1. A group of Fifty (**50**) grade 7 students were asked whether they used either Facebook or Tiktok or both. Twenty four (**24**) of these students used Facebook, and thirty seven (**37**) used Tiktok. How many students :

1.) used Facebook only? _____

2.) used Tiktok only ? _____

3.) used both Social networking sites? _____

$$F + T = \square + \square$$

$$= \square$$

$$F \cap T = \square - \square$$

$$= \square$$

2. The Venn diagram shows Grade 7 student's interests in two Math Clubs – Sudoku and Damath. If 150 students were asked, how many students were :

Questions	Answer
a. In Damath Club Only?	
b. In Sudoku club only?	
c. In Damath or sudoku club ?	
d. In both Damath and Sudoku Club ?	
e. Not in Damath nor Sudoku Club ?
