Answer the word problems below using the Law of Conservation of Mass.

11. Hydrogen and oxygen react chemically to form water. How much water would form if 24.6 grams of hydrogen reacted with 33.6 grams of oxygen? ($H_2 + O_2 \rightarrow H_2O$)

12. When ammonium nitrate (NH_4NO_3) explodes, the products are nitrogen, oxygen, and water. When 55 grams of ammonium nitrate explode, 22 grams of nitrogen and 10 grams of oxygen are formed. How many grams of water is produced? ($NH_4NO_3 \rightarrow N_2 + O_2 + H_2O$)
