Desert

Desert is a large area with very little water and few plants. Many deserts have extreme heat and lots of sand. They receive very little rainfall that it why they are extremely dry. Deserts have four types; hot and dry, coastal, semiarid and cold deserts.

The largest hot desert is the Sahara in Africa. The temperature in the Sahara can rise up to 50°C but at night it can go below zero.

Did you know that the Antarctic is also the biggest desert in the world?

The Antarctic and the Arctic are the two largest polar deserts on earth.

Although the Sahara is very hot, it is home to many animals like the camels, foxes, spiders, elephants and lions, and plants such a cacti and wildflowers.

The desert is a beautiful place but heat, severe sunburns and insects' bites can be dangerous so people need to be prepared.

The Great Barrier Reef

The Great Barrier Reef is the world's largest coral reef system.

Coral Reefs

It is one of the natural wonders in the world. It is larger than the Great wall of China and the only living thing on Earth visible from space.

The reef is located in the Coral Sea in Australia. The great Barrier Reef is in tropical waters where temperature is warm in summer and winter.

A coral reef is a cozy and safe place to live for many animals like the jellyfish family, Whales and dolphins. More than 1500 fish species live on the reef such a clownfish and also turtle, blue ringed octopus and about 5000 species of mollusk as well as 400 different corals.

Blue Ringed Octopus

Sea Turtle

Clownfish

Mollusks
