WORLD BLOG

I am sitting near Mount Vesuvius, a famous active volcano in Italy. When Vesuvius erupted in AD 79, it destroyed the Roman city, Pompeii. Mount Vesuvius last erupted in 1944, but experts and locals are worried that it could happen again soon!

I am speaking to Dr. Rosalia Dell'Aquila, an expert in volcanoes, and to Donna Esmeralda, who can remember the last time that Mount Vesuvius erupted.

Donna Esmeralda explained to me why she is so worried. She said "We are seeing many things we saw last time. My neighbour's cows aren't giving milk and her bees aren't coming back. My dog isn't happy - she isn't sleeping at night. The same thing happened in 1944."

Dr. Dell'Aquila says "Now we are good at knowing when a volcano can erupt. Donna Esmeralda's comments are very interesting. Scientific tests are also telling us about a possible eruption. We're testing things like CO₂ and it is high. But the magma inside the volcano isn't rising and we aren't seeing any deformation of the land."

Dear Sir / Madam,

I am writing to you on behalf of our school, Rosedale High. Today we are celebrating International Earth Day and are trying to improve the school's environmental footprint by looking at all our resources.

The school canteen makes lunches for over 800 students and teachers every day. Most of this food comes from across the country.

Today we are contacting local farms and other food producers to ask if you would like to work with our school.

Please write to us with details of what you supply and your charges.

Yours faithfully,
Lewis Brown
