

1. Choose L (living thing) or NL (non living thing)

Don't born

Don't reproduce

Perform this vital
function: nutrition

Die

Perform this vital
function: interaction

Perform this vital
function: reproduction

Don't grow

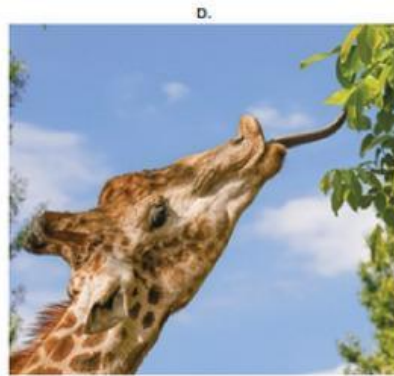

2. How are cells organised? Order the parts of a living thing from 1 to 5.

- A living organism
- An organ
- Tissue
- Organ systems
- A cell

3. Write T (True) or False (F)

- The smallest living unit in an organism is called a cell.
- Unicellular organisms have between one and three cells.
- Algae and bacteria have only one cell.
- All the cells in a multicellular organism have the same function.
- People, plants and animals are all multicellular organisms.

4. Choose nutrition, interaction or reproduction

5. Choose the odd one in each group

- eagle / dog / cat / water
- education / interaction / nutrition / reproduction
- tree / flower / rose / mushroom
- cell / tissue / organ / guitar
- plants / animals / lion / monera
