Unit 7 TB page 75 60

Narrator We asked four more children, "What will school be like in 200 years' time?"

1 In there will be too on Earth, so I think we will have in . People will live in space . Children will also go to school on the space stations. There will be for more about their in space.

2 I think that won't have to go to school in 200 years' time. The children will at home very computers. They will have for sports, and doing other things because they won't have to travel to .

3 I don't think will very much. I think children will still go to schools and learn from their teachers. The is that all children will have their own computers in the classroom. There'll be to us learn.

4 children will have to help them with their and them when to and . The robots will a best friend for the children because they will to them and help them with
