For questions number 1-5. Choose A, B, C or D for the right answer!

Buffalo

Buffalo are big, strong, dark-coloured mammals with huge horns.

African buffalo live in herds of several hundred-usually near water, as they love to wallow in mud.

African buffalo have very bad tempers, so humans have never managed to tame them.

Water buffalo are found in the wetter areas of Asia. Few are found in the wild now and they are mostly kept as farm animals. Water buffalo have been domesticated for 3.000 years. They are used to pull carts and ploughs, but they can be kept for their meat, milk and hides. Only a few survive in the wild in Asia, but buffalo are released to run free in the swamps of Northern Territory of Australia.

1. Why have humans never managed to tame African buffalo? Because they have very
 - A. big body
 - B. strong horns
 - C. bad tempers
 - D. bad habits
2. We can find water buffalo in the water areas of
 - A. Africa
