

Add or Subtract unlike fractions. Simplify (reduce) when possible.

a.  $2\frac{2}{5} + 6\frac{1}{2} =$

b.  $2\frac{1}{4} - 1\frac{3}{5} =$

c.  $4\frac{3}{8} + 1\frac{5}{6} =$

d.  $3\frac{3}{4} - 2\frac{10}{12} =$

John baked a pie and ate  $2\frac{3}{4}$  slices, while Sarah ate  $1\frac{1}{2}$  slices. How many slices of pie did they eat in total?

Emma had  $5\frac{3}{4}$  cups of lemonade, but she drank  $2\frac{1}{3}$  cups. How much lemonade does she have left?
