

Homework

Complete this text about this awesome dinosaur using the following words.

Pterodactyls flying reptiles of prehistoric times.

They about 145 millions years ago, at the same time as dinosaurs. Paleontologists found their fossils all over the world.

Some pterodactyls were 11 meters long and 250 kilograms. Some others were as small as sparrows.

They two big wings and a beak. Their back legs were long and thin. Archeologists think they feathers like birds, but they could fly.

They fish, so they were carnivorous. They had hooked claws and sharp teeth to hunt their preys.

Now, write down the present forms of the actions in the past from the text. (There is an example, but there are no options here. Let's remember! You can do it!)

were → **are**

ate →

had →

lived →
