PHOTOSYNTHESIS

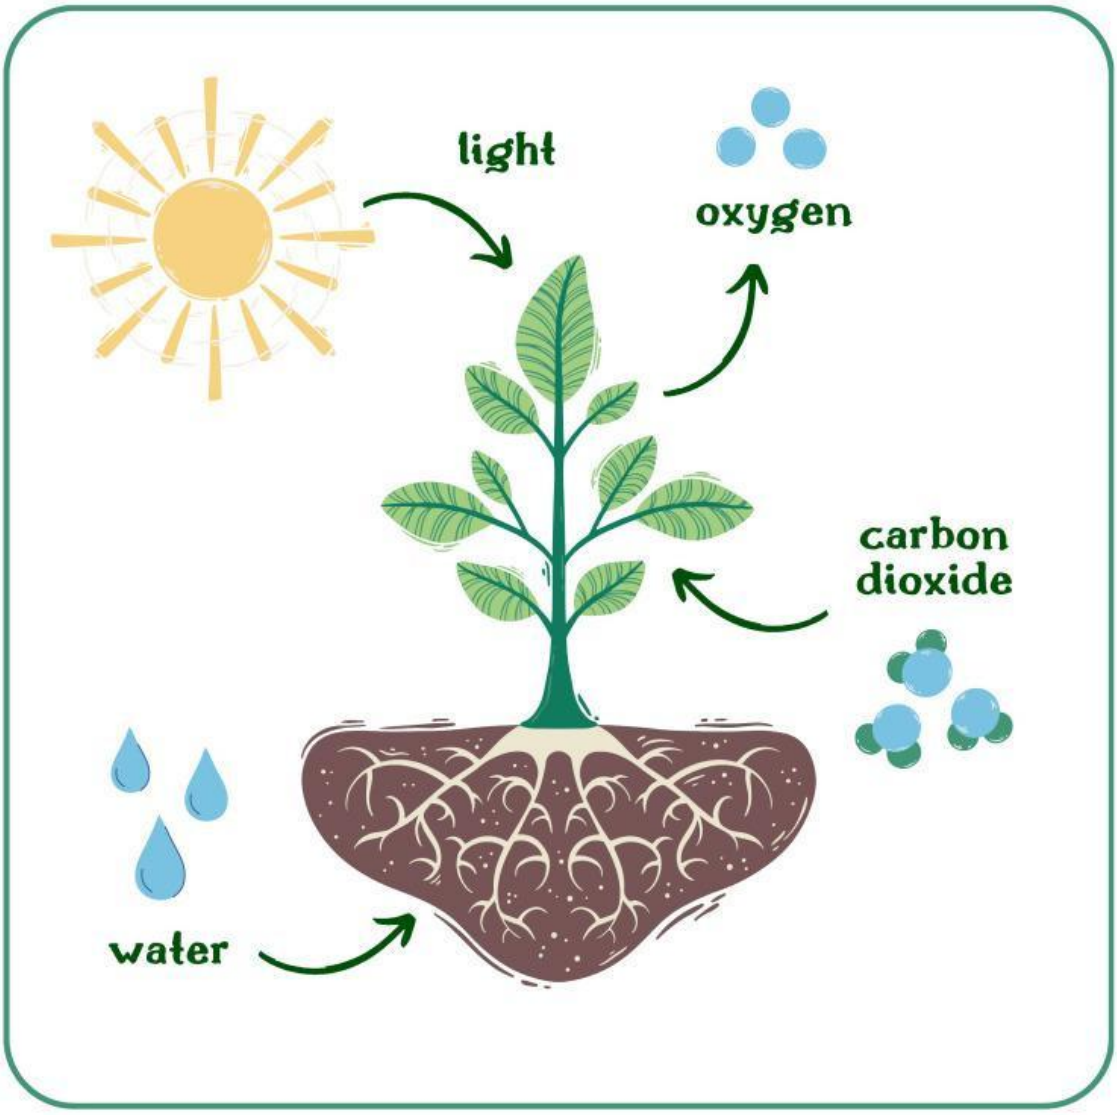
Task: Complete each of the questions using the diagrams provided and additional research (if necessary).



What is the main source of energy that drives the process of photosynthesis?

_____

LIVEWORKSHEETS

(light energy)

carbon dioxide + water -> glucose + oxygen

Where is the water used in photosynthesis sourced from?

_____

What the 'ingredients' are required for photosynthesis to occur?

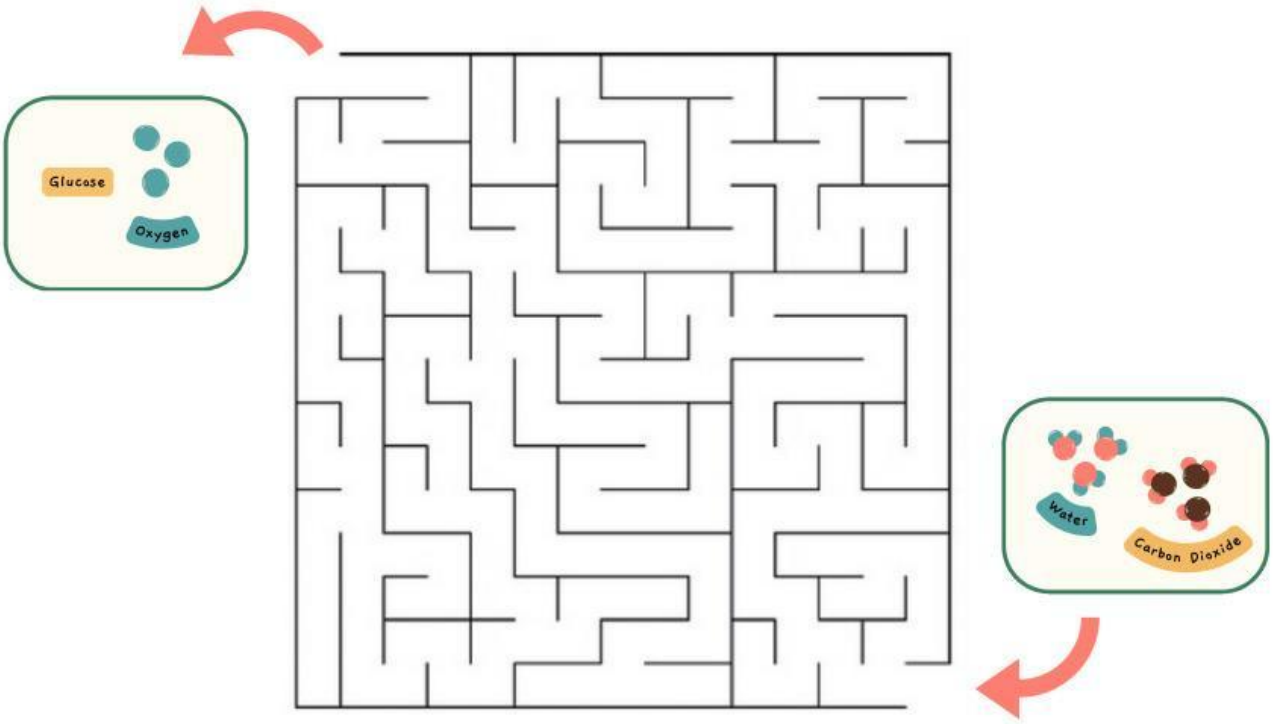
- [ ] water
- [ ] oxygen
- [ ] carbon dioxide

what are the results of photosynthesis stored in the fruit?

- [ ] glucose
- [ ] oxygen
- [ ] water

CHALLENGE QUESTIONS:

Find the right path:



LIVEWORKSHEETS

What is the gas produced from photosynthesis?

Speak here:

Clisk the “listening icon then answer the question.

_____

CHALLENGE QUESTIONS:

Find three words related with photosynthesis

F	L	O	W	E	R
A	I	B	O	H	L
I	G	C	E	D	Q
L	H	A	D	K	B
S	T	E	M	R	P
J	K	H	E	Z	O

LIVEWORKSHEETS

The Parts of a Flower

The flower is the part of the plant that blossoms and produces the seeds that are needed for new plants to grow. Test your knowledge of the terms discussed in class by answering the crossword below!

Down:

1. Egg cells of the flower
2. These protect the bud of the flower.
4. Where ovules are produced
5. The male reproductive structure of a flower
8. The female reproductive structure of a flower

Across:

3. Powdery substance that leads to the fertilization of the flower
6. These brightly colored parts of the flower attract pollinators.
7. The sticky part of the flower that catches its pollen
8. The stalk of the flower
9. Holds the grains of pollen
10. Supports the stigma, connecting it to the ovary of the plant
