– 10 questions –

Read the text. Choose the right words and write them on the lines.

X-rays

Example

When someone breaks an arm or leg, they need to go to hospital to have an x-ray. An x-ray is a special kind of photo helps doctors to see inside a person's body.

Dentists use x-ray machines to fix problems. X-ray photos can show the dentist where there are any broken teeth or teeth that have holes in A man called Wilhelm Rontgen invented the x-ray machine the end of the 19th century. The first x-ray that he was of his wife's hand. Rontgen won prizes for his important new idea.

People used x-rays to help shoes in the middle of the last century, too. They used the machine to help them choose the shoes.

We find x-ray machines in shoe shops now, but they are in airports. These machines look inside rucksacks and bags that people take on planes.
