

Classifying triangles

Look at these different triangles.

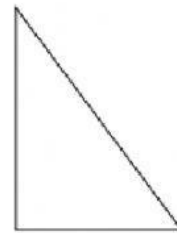

Equilateral
(all sides equal;
is also isosceles)

Isosceles
(two sides equal)

Scalene
(all sides different)

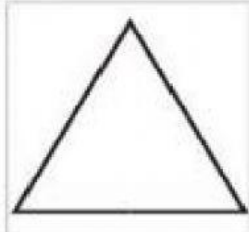

Right angle
(may be isosceles or
scalene, but one angle
must be a right angle)

Classify the following angles according to their sides.

1.

2.

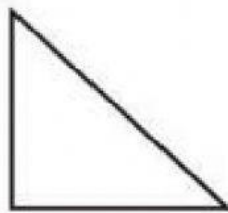

3.

4.

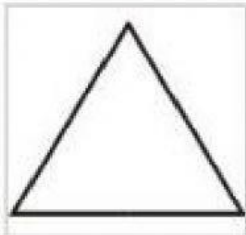

5.

6.

7.

8.

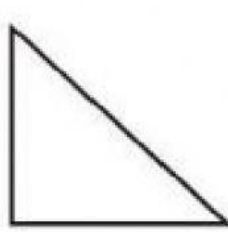

9.

10.

11.

12.
