PART 4
[6 *marks*]

Questions 15 to 20
Read the texts about three different methods to save the environment. Choose the correct method (**A**, **B** or **C**) which fits the descriptions.
For each question, choose the correct answer (**A**, **B** or **C**), mark the correct answer **A**, **B** or **C** on your answer sheet.

A	**Planting more trees** Last week, I took part in my neighbourhood's Plant-a-Tree Campaign. I have learned that planting trees is one of the easiest ways to save the environment. Trees make our air cleaner and less polluted because they can trap dust. Besides that, trees absorb carbon dioxide and release oxygen into the atmosphere. All living things need oxygen in order to survive.
B	**Using less plastic** Using plastic is not good for the environment because it often ends up in oceans and landfills. Plastic takes hundreds of years to degrade. It also releases harmful toxins into the environment. Nowadays, I use my own stainless-steel straw instead of a plastic one. I also bring my own reusable bag when I go shopping. Not only that, I have stopped buying bottled water. Instead, I bring my own reusable water bottle.
C	**Recycling** My school is organising a recycling drive next week. Recycling is good because less rubbish is produced. I have collected items such as soda cans, newspapers and plastic bottles from my neighbours. Before bringing the items to school, I have to clean and sort all the items. It's important to sort them as each recycling material is used in a different way.

A	Planting more trees
B	Using less plastic
C	Recycling

0	Plastic often ends up in landfills and oceans.	B
15	Don't use a plastic straw.	
16	Trees make our air cleaner and less polluted.	
17	Instead of buying bottled water, use a reusable water bottle.	
18	This person collected newspapers, plastic bottles and soda cans.	
19	Trees release oxygen into the atmosphere.	
20	Items must be sorted and cleaned before being recycled.
