A **compound word** is formed by combining two words.

Each word below can be combined with one of the other words to form a compound word. Starting with *cookbook*, take the second word, *book*, and write it on the next line. Then choose a word from the box that will make a new compound word. Continue until you have used all the words in the box.

house	way	walk	side	hill
cook	store	book	hold	up

cook + book = cookbook
