

- 1 Personal protective equipment protects first responders from various hazards they may face.
- 2 Coveralls, safety glasses, gloves and respirators are only used by personnel of fire services.
- 3 Reflective jackets are especially effective at protecting the body during the night.
- 4 Respirators must cover the whole face to effectively protect the first responder from toxic substances.
- 5 Air-purifying respirators are used to deliver clean, breathable air.
- 6 Other head protection equipment is not necessary with the use of full-face respirators.
